Personal Professional Abilities During his career he performed over 7000 surgeries, mainly of high multidisciplinary surgery. These interventions were carried out with innovative surgical techniques. They are concerned middle and inner ear pathologies, anterior and lateral skull base and cancer diseases of the head and neck. It is relevant the high number of endoscopic procedures with particular reference to the middle and inner ear and to the lateral skull base. The number of such interventions represents one of the world major case studies of that specific sector.
